CHICAGO COLLEGE
OF
OPTOMETRY

Dedication

We dedicate this book to the memory of Dr. Gilbert L. Hicks, Dean Emeritus and member of the Board of Trustees of the Chicago College of Optometry.

Any student who was fortunate enough to meet Dr. Hicks was immediately overwhelmed by his warm friendliness and his desire to help. His leadership and advice started many a wavering optometrist on the path to success.

The grievous loss of Dr. Hicks leaves a void that can never be filled.

Administration

Few of our numbers realize the vast amount of work that goes into the efficient operation of an institution the size of our Alma Mater. In 1947, Chicago College of Optometry was created by a group of farsighted men seeking to advance optometric education, professionalism, and thinking. Without these men—the administration—the organizational structure of our school would never have been conceived and the majority of us would never have received our educations. There is much more work involved in running a school than is obvious at the surface. Many major and minor problems, arising every day, must be solved correctly. Without this body, the structure of the school would collapse. To Dr. Reuben Seid, Dr. Eugene Freeman, and all the others on the administrative team, we owe a debt that can never be repaid. It was through their efforts that we are today on the threshold of professional optometry, well prepared for the tasks that face us in the near tomorrow.

Reuben Seid, M.D., D.O.S.
1898 - 1951

As FOCUS '51 goes to press, with heavy hearts we record the tragic loss of our beloved founder and president, Reuben Seid, who passed away on July 8, 1951.

*"Life's race well run
Life's work well done,
Life's victory won,
Now cometh rest. . . ."*

Faculty

Webster defines FACULTY as "the body of persons entrusted with the government and instruction in an institution dedicated to education." To the faculty of the Chicago College of Optometry we entrusted ourselves and have now emerged from the school as Optometrists well grounded in our profession. We are secure in our knowledge that the teaching staff did all (sometimes more) in its power to give us the very best education available.

In the years to come, when we reminisce about our college days, we will not recall the long hours spent in study, the many examinations we worried about; but we will recall the many enjoyable hours when our instructors stepped down from their chairs of learning and mingled with us. We will recall the many individual characteristics of our instructors, and their many cheerful antics.

On the other face of the coin we will always remember the very excellent instruction we received from our teachers and in years to come we will realize how well they prepared us for our vocation.

Webster's Concise Standard Dictionary defines a council as an assembly for consultation. This, in a nutshell, is the Student Council of CCO. It is a medium giving the students an opportunity to express their views and ideas and to consult with the administration regarding school policies.

When the kernel is examined, more of the working machinery is revealed. The council is the guiding hand in many extra-curricular activities and the all-school functions. This is quite understandable since the council encompasses, in one way or another, virtually every campus organization and is in the best position to promote the ideas of these various groups.

To accomplish this, it is necessary to have a tightly knit organization with good leadership. CCO's Student Council has always been tops in both departments. The sixteen members comprising the elected representatives of eight classes work well together. A visitor at any of the council meetings would be likely to hear a good deal of verbal give and take, but once a decision is reached, cooperation is the byword. As for leadership, the council prexy has a reputation for getting things done.

At every council meeting, held regularly every two weeks, at least one member of the administration is present. This facilitates rapid and accurate replies on many problems which would otherwise take time to be answered; and time is the one thing the council is short of—both time for meetings and time for carrying out plans and suggestions.

For those questions which cannot be solved immediately, those activities which need planning, those worthwhile ideas which need investigating, proper committees are set up. The council then acts on the findings and suggestions of the committee.

One of the most far reaching acts in the history of the Student Council was inaugurated quite

recently. After much discussion and debate, and with an approving vote by the student body, a system of student government went into effect which is changing previous patterns. Under this new system, the student is placed in the position of conducting himself in a professional manner at all times. In a sense it puts the student on his own honor at all times including during examinations which are taken without proctors. It is hoped that this will give each student the opportunity to realize and face his own responsibilities.

The Omega Epsilon Phi fraternity was formed in answer to a need for a non-sectarian fraternity at the school of Optometry at Columbia University. It was founded in the Executive Room in Earl Hall, October 12, 1919, by Brothers Alexander J. Broder, Abraham L. Braubart and Daniel D. Weiss. These men realized that an organization which would transcend the bounds of race, creed or color, could promote the cause of Optometry by encouraging the study of its principles and problems and by striving for higher ethical and educational standards within the profession.

The Iota Chapter was founded on the CCO campus on December 12, 1948, and rapidly grew to be the largest in the school. Many prominent speakers addressed O. E. Phi members during the past year. Much was learned about the profession, its opportunities, its pitfalls and its relationship with other professions.

Amidst a turbulent world where friendship, ethics and tolerance are rapidly vanishing, the fraternity, as a stable unit can and must be a force in counteracting the disappearance of these qualities. Omega Epsilon Phi, in its growth from a small group of fifteen to a national organization with seven chapters containing a membership of nearly a thousand, has endeavored to promote better understanding of the problems which face us daily and a spirit of comradeship. In this our fraternity has not failed.

Phi Theta Upsilon International Optometric Fraternity, founded in 1924, is dedicated to the advancement of optometry as a profession and to the cultivation of a spirit of brotherhood among its members.

In order to advance the profession of optometry, Zeta Chapter strives to improve the calibre of men entering the field. Scholarship and leadership are therefore encouraged and awards are presented to the two brothers in the graduating class who have excelled in these endeavors. A membership is maintained in the American Optometric Foundation to help support research education; while within the Chapter there is a Committee on Professional Advancement.

Fellowship is essential to a spirit of brotherhood in any organization. Therefore, supplementary to its professional aspects, Zeta Chapter is active in both athletic and social functions. The highlight of social activities is the formal

dance given at the end of the semester for the graduating brothers. In addition to the more important social functions, are the informal parties that are given frequently.

An invaluable asset to the Chapter is the Zeta Club, composed of the wives of the active members. This club maintains its own calendar of social events and aids in the promotion of the ideals of Phi Theta Upsilon.

Alumni and honorary members of Zeta Chapter of P.T.U. include many outstanding men in the field of optometry, among whom are: Dr. Harry S. Pine, past president of the American Optometric Association; Dr. Glenn H. Moore, past president of the Illinois Optometric Association; Dr. Newton K. Wesley and Dr. George N. Jessen, founders of the American Optometric Center; and Morton L. Abram, L.L.B., D.O.S., Executive Vice-President of the Chicago College of Optometry.

BUFORD KIDD	Master-at-Arms
JAY C. NATCHEZ	Chapter Editor

Mu Sigma Pi was founded in January, 1932 with Dr. Eugene Freeman as sponsor. Having its beginning at Northern Illinois College of Optometry, the Alpha Chapter evolved laying the groundwork for one of the foremost optometric fraternities in the nation.

The fundamental precepts upon which the fraternity was founded was to afford the opportunities and privileges accorded only members of a professional fraternity. To promote the highest standards of optometry, to form a close fraternal union among its members, to foster and maintain a spirit of mutual moral aid and support, to encourage research in the field of optometry, to promote education along modern trends, to instill and maintain in the hearts of its members a love for our chosen profession and loyalty to our Alma Mater are the principle aims of Mu Sigma Pi.

On April 23, 1950, thirty six pledges of the Chicago College of Optometry were

initiated into the fraternity by the Alpha Chapter. With Dr. David D. Michaels as faculty sponsor, these pledges became the nucleus of the Beta Chapter at our college.

Since its inception, the Beta Chapter of Mu Sigma Pi has proudly presented a number of educational endeavors and participated in all inter-fraternity functions with great zeal. A dinner sponsored by the fraternity during the Great Lakes Congress afforded the members the opportunity to meet and exchange views with many great notables in the optometric field.

Mu Sigma Pi has established itself as a great producer of honor students and is justly proud of having contributed to the optometric profession such dynamic names as Eugene Freeman, Jack Copeland, Irving B. Borish and David D. Michaels. Among its celebrated honorary members are such notables as Drs. Z. John Bruce Schoen, Morton L. Abram, Leo Manas, E. R. Tennant, Sam L. Udell, Milton Sternberg and M. A. Masuoka.

Council on Ethics and Professional Advancement

OFFICERS

GEORGE A. BANKS	President
EDWARD FRIEL	Vice-President
JOHN McBRIDE	Secretary
JACK HIER	Program Chairman
JOHN GREENWOOD	Treasurer

THE COUNCIL ON ETHICS AND ADVANCEMENT OF PROFESSIONALISM assumes the role of an organization dedicated to the promotion of ethical and professional Optometry. In this capacity it has spiralled in popularity since its inception in January, 1950, to become one of the leading organizations within our college.

The council maintains that the best way to further professionalism in Optometry is through the student and therefore granting membership to anyone displaying a sincere desire for Ethical Optometry.

The goal of the council is to present its members with a variety of lectures and discussions by Optometric and other professional men. The purpose is to enable the student to be well grounded in and fully aware of all the aspects of an ethical and professional practice.

Each learned profession, be it Theology, law, medicine, etc. has a code of standards that are rigidly adhered to by the great majority of men in the field. The reward for such adherence is a greater monetary gain, personal satisfaction and social prestige in the community in which the practitioner pursues his calling.

The altitude of an office has very little bearing on the success of an Optometrist. Various controversies occur on the merit of the nth floor versus the ground floor. This controversy ceases to exist when it is recognized that the final choice of location is definitely up to the individual. It is wisest to conform to the traditional pattern set up by other professional men in the community. The surrounding environment must be taken into serious consideration since the patients' habits are consistent with the environment. It is obvious that locating on the ground floor in a commercial section will result in shoppers rather than patients frequenting the office; and still more obviously, this would be a serious detriment to any professional prestige.

The largest asset to any practice is the referred patient. The professional man is not judged by the altitude of his office, but by his ability to resolve the complaints of his patients into satisfaction.

The final test is the question: "How do I as a DOCTOR compare with other professional men who rate the same title of DOCTOR, from whom patients receive professional services?"

Clinic

A Message from Dr. Tennant

Clinical science in optometry represents the unification of skill with the application of theoretical interpretation.

It is here that lectures and textbooks come to life; and all the knowledge and all the efforts are directed towards the one and only person—the patient.

It is here where the student meets his patient for the first time with a feeling of fear and anxiety which soon turns into confidence and pride.

Grave indeed is the responsibility of the clinic staff; to mold the interne towards the final goal of becoming a practitioner; to teach him the correct attitude towards his profession and his patients; to instill in him the respect and honor for his chosen profession; and to educate him to the proper cooperation with other professions.

To accomplish this difficult task, the clinic staff has constantly thought of new and better ways of teaching, lecturing, and demonstrating. Open discussions have helped to clarify many difficulties, and personal interviews have solved many problems. I feel certain that I speak in behalf of all the graduates in expressing sincere thanks and appreciation to the staff.

But we would never have succeeded were it not for those in whose interest we all work—our students. Their outstanding cooperation and desire to learn and help was our constant stimulus. In the second semester of 1950, a group of internes selected by their respective classes formed the Clinic Council for the express purpose of furthering and improving our clinic. Also, it would establish a closer link between the staff and the interne.

With little difficulty a system of honor was installed in the clinic, teaching each man self reliability, self control and above all, pride in his accomplishments.

As you graduates leave our institution, the best wishes of the entire staff and personnel go with you: may success, prosperity and happiness be yours. Always remember that the portals of our clinic will constantly be open to you. Let us continue to work together and remain companions so that as a unit we may advance and further our profession for the benefit of mankind.

PUBLICATIONS

The rapid growth and achievements of the EYES RIGHT is, in a way, a reflection of the growth of CCO. Starting with a single mimeographed page, the paper has reached the heights of being the best optometric undergraduate publication.

The first EYES RIGHT editor for CCO was Leonard Drucker who held the post from December 1947 to August 1948. The post was then turned over to Norbert Kostner who continued to improve the paper during his one and a half years of editorship. Through his efforts, the publication became a member of the Associated Collegiate Press which later awarded EYES RIGHT a First Class Honor Rating in a nationwide critical survey. In May 1950, upon Kostner's graduation, the paper was turned over to Sidney Groffman and Walter Zinn. Still it kept growing. New features were added, the number of science articles was increased, a photo page was introduced, and the editorials became more stinging. The net result, after one year, was that the Associate Collegiate Press bestowed upon EYES RIGHT the coveted All-American Rating which is the top award possible.

JUNE, 1951

EYES RIGHT All American Rating

The judges of the Associated College Presses have awarded EYES RIGHT the official under-graduate publication of the Chicago College of Optometry the highest rating in the country. The judges have awarded it a gold medal for the year 1950-51. EYES RIGHT has reached this position in the year 1950-51. The judges have awarded it a gold medal for the year 1950-51. The judges have awarded it a gold medal for the year 1950-51.

The judges commented, based on the professional nature of campus paper does an outstanding job of presenting the scientific articles, news features and editorials. The illustrations and photographs were also cited.

The Associated College Presses have awarded EYES RIGHT the official under-graduate publication of the Chicago College of Optometry the highest rating in the country. The judges have awarded it a gold medal for the year 1950-51. The judges have awarded it a gold medal for the year 1950-51.

Life At C.C.O.

by Kirby Nelson

NOW, HOW MANY BIG STAKES DO YOU SEE??

Air Force Approves C.C.O.

The following excerpts were taken from a letter by Lt. Col. Joseph P. McDonough, U.S.A.F. to Dr. Norton Aldrich.

Reference is made to your letter of 11 January regarding the accredited standing of your institution.

This office was furnished a list in October, 1950 of approved schools of optometry by the Faculty, Chairman of the Council on Accreditation and Professional Standards of the American College of Optometry. Since that date applications from all individuals who are graduates of the Chicago College of Optometry have been accepted by this office. Also, Continental Air Command has advised at that time that all graduates of the Chicago College of Optometry may be considered for reserve commission in the Air Force Medical Service. I am today again writing to let you know that the acceptance of our previous recommendation concerning the date of graduation from your school.

Overcoming a powerful scoring attack

CLINIC COUNCIL FORMED McKeown, Irwin Elected Co-Presidents

Dr. Richard Tenant, Director of the Chicago College of Optometry Eye Clinic, will be composed of two representatives from each class that is in attendance at the clinic. This will include junior interest as well as examining interns.

The clinic council will function in much the same fashion as does the student council of the college. They will discuss and take action on recommendations and suggestions proffered by students relating to the activities of the clinic.

Underlying all their activities will be the establishment of a permanent working arrangement between the clinic administration and the students. Dr. Tenant.

YOUR ANSWER PLEASE

THE OPTICIAN: Do you believe that the establishment of a National Board of Examiners in Optometry would be beneficial to the profession? (Send of the graduating class)

THE ANSWERS:

your answer Yes, I believe that the establishment of a national board would benefit optometry. Such an examination would tend to unify the profession by standardization of the material taught in the schools and that give men in different sections of the country common ground on which to build a better profession.

Norman Schaller: Yes, such an examination would be beneficial to optometry. The national examination would have a value of place in which to distribute the information of the so called

by Julius Gensberg

As a lower classman, I was always told that the Senior 11 knows everything. I hope that this feeling is still existent, since it is the sole authority for the lower follows.

First, I would like to express my feeling of compassion for the young Jews who by my experience are a sort disoriented lot. They act as if they were standing at the Tower of Babel, amidst the confusion of tongues, hoping for a little understanding of the information that is being given to them. Let me assure them that the loose ends are soon tied into a long string that can be rolled into a solid ball of knowledge, that will be quietly submerged in the depths of memory...never to be dredged.

[illegible]

DR. TENNANT NAMED CLINIC DIRECTOR

Richard Tennant, O.D., D.O.S., assistant professor of Physics, Geometrical Optics and Physical Optics at the Chicago College of Optometry, has been appointed clinic director of the college, replacing Ernest Takahashi, R.S., O.D., D.O.S., who is currently on leave of absence.

Exam Hints

by Leo Stein, C.P.A.

1. Don't stay out late the night before the examination and expect to do a good job on the day of the exam. Be fair with yourself.

2. Don't cram late hours on the evening just before the exam. If you don't know your subject on the day preceding the exam, the extra hours of cramming may do you more harm than good.

3. The examination room is not a 'Horror chamber.' Relax, be comfortable.

4 If the examination is an all day affair, watch your diet that day. Don't eat a too heavy lunch.

5. Have your pencil, pens, eraser, etc., in good working condition.

6 Remember that the only judge of your capabilities is the man

ner in which you write your paper. Watch your commas, punctuation, spelling, etc.

7 Write legibly and write on the
line! The examiner isn't an ac-
robat, and doesn't like to spend
needless time determining the

8 Don't repeat the question
batim in your exam. The

AGERS END SEASON ON A LOSING NOTE

Nervous System Of The Eye And Orbit

This is the third in a series of articles

ATHLETES FETED AT DEANS HOME

Honore was paid to the conquering heroes who comprise the athletic teams of CCC when they were treated to a roast beef feast at the home of Dean Eugene Freeman. 32 persons were present including such stellar knife and fork big leaguers as Coach Carl Stoksdale, Dr. Morton L. Abram and Comptroller E. Stein.

Following the delicious edibles came the presentation of three sound movies. The first two were from the "Doc Carlson" athletic series featuring techniques on

to the ciliary ganglion from the ciliary root synapses, they enter the eyeballs as nerves. Another possible route for - is to bypass the ciliary ganglion by way of long ciliary fibers pierce the sclera, choroid, (perichoroid) - of the iris, muscle of iris.

MR. CARL STOCKDALE
Coach

Basketball

Optimism reigned supreme among the athletic hierarchy of the Chicago College of Optometry when the 1950-'51 basketball season opened. A thirteen man team averaging over six feet tall had reported to coach Carl Stockdale for practice. Included among them were eight lettermen from the previous year's squad which had compiled a creditable record of six wins and four defeats. Heading the veteran list was Mort Ennis who had averaged over twelve points per game to lead all the scorers the year before. Ennis was starting his third year of varsity ball. Other three-year men who returned were rugged Stan Jayroe, hard playing guard from Texas, tall center Bob Irwin and smooth Roy Hedlund. Rounding out the veteran list was star playmaker Bob Clawson, high jumping John Luckow, Don Tombaugh and Bob Levinson. This nucleus of experienced players was strengthened by the addition of Paul Sears. Sears impressed everyone with his outstanding shooting ability and won himself a starting berth. Unfortunately, however, he was a senior and could only play for one semester.

Coach Stockdale arranged a seventeen game inter-collegiate schedule for the cagers. This nearly doubled the previous season's card of ten games. The quality of the competition was likewise improved. Included on the schedule were most of the Chicago Junior Colleges who consistently turn out fine teams. Other power houses on the card were the freshmen teams of DePaul and Loyola University who have acquired national recognition for their basketball prowess. Service teams were represented by the Great Lakes Mariners and the Ft. Sheridan Sailors which was the only team to defeat C.C.O. at home the previous season.

When asked about the squad's chances coach Stock-

dale said, "Even though the caliber of competition has increased tremendously, I feel that with the spirit and team play displayed by our boys, the squad will prove itself worthy of the support that the student body has always given it."

The first game was an away game with the University of Illinois Professional school. Displaying a powerful scoring attack combined with tight defense, the Blue and Gold trounced the Illini squad 60-44. In the second contest a tall, polished and well coached Herzl Junior College team handed the C.C.O. cagers their first defeat 54-44. This initiated a losing streak which the Eyemen were unable to shake. At midseason time the team had lost seven straight games and were due for more trouble with the graduation of Paul Sears and Bob Irwin. Sears' absence was acutely felt because the tall forward had poured 102 points through the hoop in six contests. Coach Stockdale tried desperately to put the team back in the win column—but to no avail. Despite all efforts, the C.C.O. squad wound up the season with a dismal 1 win and sixteen lost record.

The fault was undoubtedly the lack of proper conditioning. Schools like Loyola and DePaul make allowances for their varsity teams and schedule them for several hours of practice daily. Chicago College, on the other hand, cannot do this because of the more rigid scholastic requirements. It seemed that as long as the C.C.O. five could run with their opponents the score stayed respectable; but as the game progressed the speed and stamina of the opposition literally ran the Eyemen into the ground.

Despite the results, every member of the team deserves praise for giving his all, and coach Carl Stockdale merits special acknowledgement for his tremendous job of molding the team into a fighting unit.

ADVERTISING

Facing Life Courageously . . .

The great lesson of college lies beyond the education that leads to a career . . . it lies in one's understanding of his relationship and responsibilities to his profession, to his country and to humanity.

Yours is the responsibility of keeping a great profession great . . . of keeping abreast of new discoveries and new techniques in your chosen field . . . of deserving and winning and holding the trust and respect of your community . . . of upholding professional ethics and contributing to the common good.

Yours, too, is the responsibility in these times of tension to face life squarely and realistically . . . to remember at all times that our nation was built on a foundation of faith, not of fear . . . and that the power and the glory of America lie in her birthright of freedom and opportunity for all.

It is in this spirit of courage and faith, of hope and vision that we extend sincere wishes for your success on the threshold of your career.

Even in the era of styled spectacles, very few people want simply "a pair of glasses." What they **do** want is **complete visual comfort**. When people see well and without effort, they work better, play better and live in a more enjoyable world.

This condition, of course, is brought about by regular professional eye care. Yet even the most competent practitioner seldom, if ever, hears direct praise of his professional accomplishments. The satisfaction of his patients can be measured only by the fact that they **return** to him for professional services.

At the same time, such a professional man can count on this: satisfied patients do tell their friends. And thus reputation arising out of ability and genuine interest in the patient's problems invariably leads to a successful practice. In this way the refractionist enjoys the economic freedom so necessary if he is to discharge the moral obligation of his profession.

Triumph of Research
and Engineering

a piece of glass

EVERY optometrist knows the miracle-like accomplishment that can be worked by a quarter-ounce of glass. The precious gift of the ophthalmic lens is that of efficient vision—tool of learning ability, earning ability, and human happiness.

But that bit of glass itself is a scientific triumph of high-ranking importance. The problems involved in making glass of proper optical and physical characteristics defied all attempts in the United States before World War I. Under stress of that military urgency, the first successful American glass was

produced at Bausch & Lomb. The research and experimentation, the scientific and technical skill, that have been put into glass-making technology in the Bausch & Lomb plant for more than 34 years since are reflected in the high quality of the glass now produced.

On the principle that optical quality begins with glass quality, Bausch & Lomb has long accepted responsibility for pioneering in glass making. From this glass come lenses we offer with pride, lenses that merit your highest professional confidence.

BAUSCH AND LOMB OPTICAL CO.

Optical Quality Begins With Glass Quality

Craftsmanship

HAS BEEN THE KEYNOTE of Rogers yearbooks for forty-three years. And it will continue to be our ideal, because responsibility to see that your publication is well printed is shared by the entire organization.

The Rogers tradition of sincerity and quality has been recognized by many schools as a security to the institution and an inspiration to the staff.

"Jahn & Ollier Again"

A familiar and reassuring slogan

FAMILIAR...because it has appeared in thousands of the country's finest yearbooks for the past half century.

REASSURING...because those years of specialized experience bring complete service, outstanding quality and dependable delivery to the yearbook staffs, with whom we work.
